Empowering Law Enforcement with
Qorela IMC Technology

OVERVIEW

Qorela IMC is a robust solution for law enforcement, designed to facilitate the identification and analysis of illegal activity data from Service Providers. The system boasts a high level of efficiency and is capable of processing high transaction rates, making it ideal for large telecom networks.

The platform adheres to ETSI and 3GPP standards and is compatible with equipment from various vendors. It can seamlessly integrate into existing networks and features a secure segregation capability for enhanced security.

KEY FEATURES

Electronic Surveillance:
Qorela IMC is the ultimate electronic surveillance solution for data and calls collection and analysis, integrated with LIMS for real-time monitoring and informed decision-making.
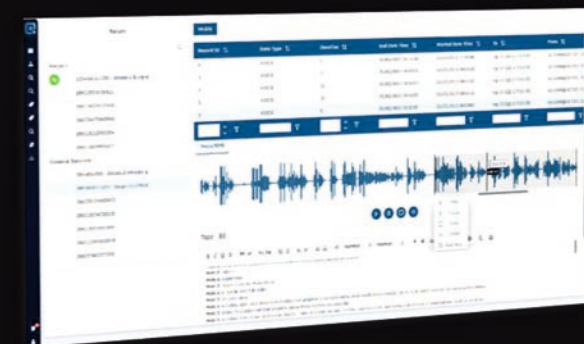

Ai-Powered Recording:
Qorela IMC uses NLP to automatically convert voice data to text for improved performance and ease of transcription.

Conversation Summary Extraction:
It is designed to effortlessly extract key insights and summary information from conversations, streamline your communication process and increase intelligence success.

Live Listening:
The system seamlessly captures voice conversations and transmits them instantly to the team of skilled operators

Data Analysis:
Unlock the full potential of your data with our advanced data analysis capabilities.

Data Visualization:
Our dynamic data visualization capabilities will help you better understand your data.

Collaborate And Share:
Collaborate and share seamlessly with our state-of-the-art cooperation and sharing tools.

Security And Privacy:
Rest easy knowing your sensitive data is secure with our top-of-the-line security and privacy controls.

IP Rendering:
Unlock the full potential of your internet traffic analysis with our advanced IP rendering feature.
